

Airport Survival Guide

Step 1: Check In online. This saves you time and prevents the unlikely but horrible possibility of your seat being overbooked.

Step 2: Make a note of where you parked. Keep your parking ticket somewhere safe and away from your phone as this can damage it.

Step 3: Weight: Don't push your luck with the weight of your luggage to be checked in. You will feel stupid if you end up paying extra for heavy luggage.

Step 4: Label and secure your luggage. Make sure your name and address are on any luggage you check in and you have used a padlock on the zip for extra security.

Step 5: Hand luggage. Don't push your luck and try and take multiple bags or a big bag onto the plane.

Step 6: Security: Put your liquids into a transparent bag before you get to the security gate.

Step 7: Security: Have your passport open at the right page as you approach the passport control.

Step 8: Belt, jewellery, phones, money. Don't be the person who holds everyone up at the metal detector. Sort this out as you queue.

Step 9: Don't go crazy at duty free. You have to find a place to put your shopping in the cabin/compartiment on the plane.

Step 10: Chill! Leave enough time to have a coffee and relax before boarding. Preferably near your gate!
